1

Launch the **App**

2

Click the **web button** to emit a single ultrasound

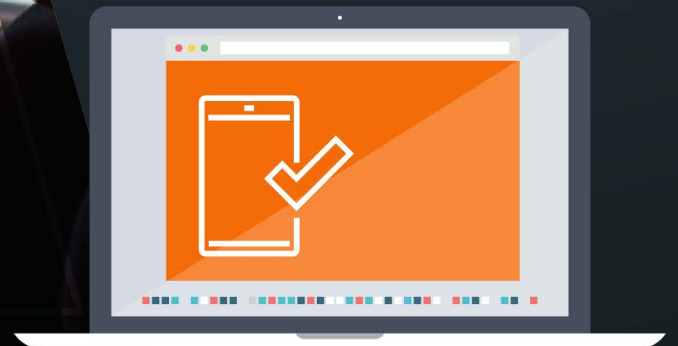

3

The **App** records the ultrasound on the smartphone

4

If the authentication is successful, the process is **validated** on the website

SonicQRcode is a QR code alternative using **ultrasound communication** between a web component and a mobile application. Instead of having to decipher a graphic QR code on the same page where the validation stage is located, we provide a unique ultrasound (One-Time Password) to achieve the same objective.
